Capstone Turbine Announces Second Quarter Results

CHATSWORTH, Calif.--(BUSINESS WIRE)--July 17, 2003--Capstone Turbine Corporation (Nasdaq:CPST) (www.microturbine.com), the world's leading microturbine power systems manufacturer, today reported its results for the quarter ended June 30, 2003. Revenue for the quarter was \$4.1 million as compared with \$7.4 million for the second quarter of 2002. Capstone shipped 108 units, comprised of 48 of its 60-kilowatt systems and 60 of its 30-kilowatt systems, in the second quarter of 2003.

For the second quarter of 2003, Capstone's net loss was \$9.4 million, or (\$0.12) per share compared to a net loss of \$30.8 million or (\$0.40) per share during the second quarter of 2002. The loss during the second quarter of 2002 included \$16.0 million from the impairment of marketing rights and \$1.8 million related to excess inventory charges.

Interim CEO, Emily Liggett, noted, "The soft economic environment remains challenging for distributed generation manufacturers, but we saw encouraging results in this most recent quarter. Capstone shipped 4.7 megawatts of power products during the second quarter of 2003. This is the highest quarterly shipment total since the 7.4 megawatts shipped during the second quarter of 2002. We began the second quarter with 7.0 megawatts of backlog and we begin the third quarter with a 5.1 megawatt backlog.

"We are working with our business partners to increase adoption of Capstone Microturbines around the world," said Liggett, "and some interesting applications were unveiled recently:

- -- An A&P Waldbaum's supermarket on Long Island held an event to showcase its C60 that not only conserves energy on the strained Long Island power grid, its exhaust is used to dehumidify the in-store air. This conserves even more energy by cutting air conditioning use;
- -- The Santa Fe Hilton where a Capstone Microturbine's exhaust heats an outdoor pool, and
- -- A Wisconsin landfill running an array of biogas-fueled microturbines."

On the company's business plan initiatives, Ms. Liggett said, "During the quarter we shipped the first commercial units of our new integrated combined heat and power product based upon our C60 system. These systems are now being deployed in commercial applications. We reached another important milestone in the second quarter by beginning testing of the power electronics for the C200 product that we target for release in 2004."

Second Quarter Financial Highlights

Gross loss in the quarter was \$2.6 million, compared to \$4.2 million for the same period in the prior year. The 2002 period included charges of \$1.8 million related to excess inventory.

Research and development ("R&D") costs increased to \$2.5 million in the period, as compared to \$1.6 million in the second quarter of 2002. R&D expenses are reported net of contract offsets. These offsets were \$0.1 million and \$1.3 million in 2003 and 2002, respectively.

Selling, general and administrative expenses decreased to \$4.7 million, less than half the \$9.7 million recorded in the second quarter of 2002.

As of June 30, 2003, Capstone had \$126.4 million in cash and cash equivalents, with no long-term debt. The company's cash utilization was \$6.2 million in the second quarter of 2003, compared to \$9.2 million in the second quarter of 2002 and \$7.7 million in the first quarter of 2003.

Conference call

The company will host a conference call today, Thursday, July 17, at 2:00 p.m. Pacific Time, to further review the company's second

quarter results. Access to the live broadcast and a replay of the webcast will be available until July 31 through the company's web site: www.microturbine.com.

About Capstone Turbine

Capstone Turbine Corporation (www.microturbine.com) (Nasdaq:CPST) is the world's leading producer of low-emission microturbine systems. In 1998, Capstone was the first to offer commercial power products utilizing microturbine technology, the result of more than ten years of focused research. Capstone Turbine has sold and shipped more than 2,500 commercial production Capstone MicroTurbine systems to customers worldwide. These award-winning systems have logged more than 4 million hours of operation.

This press release contains "forward-looking statements," as that term is used in the federal securities laws, about Capstone's business, with regard to its ability to address its market challenges, maintain or strengthen its position as a leading technology, develop new products according to plans, or its ability to increase installations or build its rate of adoption. These forward-looking statements are subject to numerous assumptions, risks and uncertainties that may cause Capstone's actual results to be materially different from any future results expressed or implied in such statements. Such factors include, but are not limited to:

- Market acceptance and quality of Capstone's technology and products;
- 2) Limited operating history characterized by net losses;
- 3) The size, timing, shipment and pricing of individual orders;
- The ability of Capstone to successfully execute its production and marketing plans;
- 5) The Company's ability to develop additional microturbine product releases; and
- 6) Other factors detailed in the Company's filings with the Securities and Exchange Commission.

Capstone cautions readers not to place undue reliance on these statements, which speak only as of the date of this release. Capstone undertakes no obligation, and specifically disclaims any obligation, to release any revisions to any forward-looking statements to reflect events or circumstances after the date of this release or to reflect the occurrence of unanticipated events.

"Capstone Turbine Corp." is a registered trademark of Capstone Turbine Corporation. All other trademarks mentioned in this press release are the property of their respective owners.
