99.1 Press Release of Capstone Turbine Corporation, dated February 5, 2004, reporting its fiscal 2004 third quarter results.

Capstone Turbine Announces Fiscal Third Quarter Results

CHATSWORTH, Calif.--(BUSINESS WIRE)--Feb. 5, 2004--Capstone Turbine Corporation (Nasdaq:CPST) (www.microturbine.com), the world's leading microturbine power systems manufacturer, today reported results for its third fiscal quarter ended December 31, 2003.

Revenue for the quarter was \$3.3 million as compared with \$3.6 million in the period a year ago. Capstone's CEO, John Tucker, said, "Our performance was off versus expectations due to some adjustments in deliveries to accommodate our customers' needs. However, we had a good order rate of 4.3 megawatts and we exited the quarter with 6.2 megawatts of product in backlog."

For the third quarter of fiscal 2004, Capstone's net loss was \$11.6\$ million, or <math>(\$0.14) per share compared to a net loss of \$20.7\$ million or (\$0.26) per share during the third quarter of fiscal year 2003

Providing an update on the Company's progress, Tucker commented, "We are continuing to enhance the depth and talent in the organization. Since last quarter, we have recruited Vice Presidents for Quality, Service and Business Development as well as for two key sales positions, The Americas and International. We continue to attack our key priorities of improving the robustness of our products, enhancing customer service and integrating the design and manufacturing process. Furthermore, we have initiated our strategic planning process which will establish a three-year roadmap for improved performance."

Tucker continued, "We have been active in pursuing several new opportunities that pose long-term prospects for the business. These new prospects span from biogas installations in Europe, to numerous projects that integrate our microturbines into larger power-packs. These power-packs range from 240-kilowatts used by UTC Power, a division of United Technologies Corporation, in their Pure Comfort 240, a combined cooling and power product; to 270-kilowatts, soon to be installed in support of the Ground Mid-Course Defense Project, to an 840-kilowatt package being developed for industrial and remote power use in Nigeria. Additionally, our distributors continue to develop exciting opportunities for Capstone MicroTurbines(TM) and we will be considering these opportunities in our strategic planning evaluations."

In summary, Tucker concluded, "We are making significant progress on our targeted priorities and, with the development of our strategic plan, we look forward to charting a positive course for Capstone's future."

Third Quarter Financial Highlights

Gross loss in the third quarter of the fiscal year was \$3.1 million, compared to \$12.4 million for the same period a year ago. Last year's third quarter included a \$5.0 million charge for the partial impairment of the recuperator core manufacturing facility and a \$3.6 million charge to adjust the warranty reserve balance. In the current period, the Company recorded \$1.2 million in warranty costs related to accommodations made to Japanese distributors.

Research and development ("R&D") costs were \$3.0 million in the period compared to \$2.0 million in the third fiscal quarter of 2003. Costs in fiscal 2003 were reported net of \$1.5 million in contract offsets. While R&D spending decreased \$0.5 million between periods, the lack of contract reimbursement offsets in the current period resulted in an increase in reported R&D costs of \$1.0 million. Capstone reported that it has suspended billing the Department of Energy ("DOE") for the AMTS program, which funds development of Capstone's C200 product, because of a current lack of committed funding. The Company noted, however, that it intends to resume billings under the program when the DOE receives additional funding appropriations for the project.

Selling, general and administrative expenses decreased to \$5.7 million from \$6.8 million a year ago reflecting lower spending rates in the current period.

As of December 31, 2003, Capstone had \$111.7 million in cash and cash equivalents, with no long-term debt. The company's cash

utilization was \$8.2 million in the current quarter compared to a use of \$4.0 million in the same period a year ago. This change primarily reflects \$4.0 million in proceeds from sale of stock a year ago.

Conference call

The company will host a conference call today, Thursday, February 5, at 2:00 p.m. Pacific Time, to further review the company's third fiscal quarter results. Access to the live broadcast and a replay of the webcast will be available until May 5, 2004 through the Company's web site: www.microturbine.com.

About Capstone Turbine

Capstone Turbine Corporation (www.microturbine.com) (Nasdaq:CPST) is the world's leading producer of low-emission microturbine systems. In 1998, Capstone was the first to offer commercial power products utilizing microturbine technology, the result of more than ten years of focused research. Capstone Turbine has sold and shipped more than 2,500 commercial production Capstone MicroTurbine(TM) systems to customers worldwide. These award-winning systems have logged more than 5 million hours of operation.

This press release contains "forward-looking statements," as that term is used in the federal securities laws, about Capstone's business, with regard to its ability to address its market challenges, identify and successfully develop the market opportunities with strong potential, develop and implement a successful business strategy, improve the robustness of its products, improve its customer service, and drive change in the business. These forward-looking statements are subject to numerous assumptions, risks and uncertainties that may cause Capstone's actual results to be materially different from any future results expressed or implied in such statements. Such factors include, but are not limited to:

- 1) Market acceptance and trends;
- The ability to enhance the quality and reliability of Capstone's products;
- 3) The limited operating history characterized by net losses;
- 4) The abilities of new management to effect beneficial changes;
- 5) The ability of the Company to develop and/or retain the distribution channels necessary to support planned sales;
- 6) The ability of Capstone to successfully execute its production and marketing plans; and
- 7) Other factors detailed in the Company's filings with the Securities and Exchange Commission.

Capstone cautions readers not to place undue reliance on these statements, which speak only as of the date of this release. Capstone undertakes no obligation, and specifically disclaims any obligation, to release any revisions to any forward-looking statements to reflect events or circumstances after the date of this release or to reflect the occurrence of unanticipated events.

"Capstone Turbine Corp." is a registered trademark of Capstone Turbine Corporation. All other trademarks mentioned in this press release are the property of their respective owners.
